- 0 Preface
- 1 Basic Concepts
  - 1.0 Introduction
  - 1.1 Introduction
    - 1.1.0 What Is Probability?
    - 1.1.1 Example
  - 1.2 Review of Set Theory
    - 1.2.0 Review
    - 1.2.1 Venn Diagrams
    - 1.2.2 Set Operations
    - 1.2.3 Cardinality
    - 1.2.4 Functions
    - 1.2.5 Solved Problems
  - 1.3 Random Experiments and Probabilities
    - 1.3.1 Random Experiments
    - 1.3.2 Probability
    - 1.3.3 Finding Probabilities
    - 1.3.4 Discrete Models
    - 1.3.5 Continuous Models
    - 1.3.6 Solved Problems
  - 1.4 Conditional Probability
    - 1.4.0 Conditional Probability
    - 1.4.1 Independence
    - 1.4.2 Law of Total Probability
    - 1.4.3 Bayes' Rule
    - 1.4.4 Conditional Independence
    - 1.4.5 Solved Problems
  - 1.5 Problems
    - 1.5.0 End of Chapter Problems
- 2 Combinatorics: Counting Methods
  - 2.1 Combinatorics
    - 2.1.0 Finding Probabilities with Counting Methods
    - 2.1.1 Ordered with Replacement
    - 2.1.2 Ordered without Replacement
    - 2.1.3 Unordered without Replacement
    - 2.1.4 Unordered with Replacement
    - 2.1.5 Solved Problems
  - 2.2 Problems
    - 2.2.0 End of Chapter Problems
- 3 Discrete Random Variables
  - 3.1 Basic Concepts
    - 3.1.1 Random Variables
    - 3.1.2 Discrete Random Variables
    - 3.1.3 Probability Mass Function
    - 3.1.4 Independent Random Variables
    - 3.1.5 Special Distributions

        - 3.1.6 Solved Problems
    - 3.2 More about Discrete Random Variables
        - 3.2.1 Cumulative Distribution Function
        - 3.2.2 Expectation
        - 3.2.3 Functions of Random Variables
        - 3.2.4 Variance
        - 3.2.5 Solved Problems
    - 3.3 Problems
        - 3.3.0 End of Chapter Problems
- 4 Continuous and Mixed Random Variables
    - 4.0 Introduction
    - 4.1 Continuous Random Variables
        - 4.1.0 Continuous Random Variables and their Distributions
        - 4.1.1 Probability Density Function
        - 4.1.2 Expected Value and Variance
        - 4.1.3 Functions of Continuous Random Variables
        - 4.1.4 Solved Problems
    - 4.2 Special Distributions
        - 4.2.1 Uniform Distribution
        - 4.2.2 Exponential Distribution
        - 4.2.3 Normal (Gaussian) Distribution
        - 4.2.4 Gamma Distribution
        - 4.2.5 Other Distributions
        - 4.2.6 Solved Problems
    - 4.3 Mixed Random Variables
        - 4.3.1 Mixed Random Variables
        - 4.3.2 Using the Delta Function
        - 4.3.3 Solved Problems
    - 4.4 Problems
        - 4.4.0 End of Chapter Problems
- 5 Joint Distributions
    - 5.1 Two Discrete Random Variables
        - 5.1.0 Two Random Variables
        - 5.1.1 Joint Probability Mass Function (PMF)
        - 5.1.2 Joint Cumulative Distribution Function (CDF)
        - 5.1.3 Conditioning and Independence
        - 5.1.4 Functions of Two Random Variables
        - 5.1.5 Conditional Expectation
        - 5.1.6 Solved Problems
    - 5.2 Two Continuous Random Variables
        - 5.2.0 Two Continuous Random Variables
        - 5.2.1 Joint Probability Density Function
        - 5.2.2 Joint Cumulative Distribution Function
        - 5.2.3 Conditioning and Independence
        - 5.2.4 Functions of Two Continuous Random Variables
        - 5.2.5 Solved Problems
    - 5.3 More Topics
        - 5.3.1 Covariance and Correlation

        - 5.3.2 Bivariate Normal Distribution
        - 5.3.3 Solved Problems
    - 5.4 Problems
        - 5.4.0 End of Chapter Problems
- 6 Multiple Random Variables
    - 6.0 Introduction
    - 6.1 Methods for More Than Two Random Variables
        - 6.1.1 Joint Distributions and Independence
        - 6.1.2 Sums of Random Variables
        - 6.1.3 Moment Generating Functions
        - 6.1.4 Characteristic Functions
        - 6.1.5 Random Vectors
        - 6.1.6 Solved Problems
    - 6.2 Probability Bounds
        - 6.2.0 Probability Bounds
        - 6.2.1 Union Bound and Extension
        - 6.2.2 Markov Chebyshev Inequalities
        - 6.2.3 Chernoff Bounds
        - 6.2.4 Cauchy Schwarz Inequality
        - 6.2.5 Jensen's Inequality
        - 6.2.6 Solved Problems
    - 6.3 Problems
        - 6.3.0 End of Chapter Problems
- 7 Limit Theorems and Convergence of Random Variables
    - 7.0 Introduction
    - 7.1 Limit Theorems
        - 7.1.0 Limit Theorems
        - 7.1.1 Law of Large Numbers
        - 7.1.2 Central Limit Theorem (CLT)
        - 7.1.3 Solved Problems
    - 7.2 Convergence of Random Variables
        - 7.2.0 Convergence of Random Variables
        - 7.2.1 Convergence of Sequence of Numbers
        - 7.2.2 Sequence of Random Variables
        - 7.2.3 Different Types of Convergence for Sequences of Random Variables
        - 7.2.4 Convergence in Distribution
        - 7.2.5 Convergence in Probability
        - 7.2.6 Convergence in Mean
        - 7.2.7 Almost Sure Convergence
        - 7.2.8 Solved Problems
    - 7.3 Problems
        - 7.3.0 End of Chapter Problems
- 8 Statistical Inference I: Classical Methods
    - 8.1 Introduction
        - 8.1.0 Introduction
        - 8.1.1 Random Sampling
    - 8.2 Point Estimation
        - 8.2.0 Point Estimation

        - 8.2.1 Evaluating Estimators
        - 8.2.2 Point Estimators for Mean and Variance
        - 8.2.3 Maximum Likelihood Estimation (MLE)
        - 8.2.4 Asymptotic Properties of MLEs
        - 8.2.5 Solved Problems
    - 8.3 Interval Estimation (Confidence Intervals)
        - 8.3.0 Interval Estimation (Confidence Intervals)
        - 8.3.1 The general framework of Interval Estimation
        - 8.3.2 Finding Interval Estimators
        - 8.3.3 Confidence Intervals for Normal Samples
        - 8.3.4 Solved Problems
    - 8.4 Hypothesis Testing
        - 8.4.1 Introduction
        - 8.4.2 General Setting and Definitions
        - 8.4.3 Hypothesis Testing for the Mean
        - 8.4.4 P-Values
        - 8.4.5 Likelihood Ratio Tests
        - 8.4.6 Solved Problems
    - 8.5 Linear Regression
        - 8.5.0 Linear Regression
        - 8.5.1 Simple Linear Regression Model
        - 8.5.2 The First Method for Finding beta
        - 8.5.3 The Method of Least Squares
        - 8.5.4 Extensions and Issues
        - 8.5.5 Solved Problems
    - 8.6 Problems
        - 8.6.0 End of Chapter Problems
- 9 Statistical Inference II: Bayesian Inference
    - 9.1 Bayesian Inference
        - 9.1.0 Bayesian Inference
        - 9.1.1 Prior and Posterior
        - 9.1.2 Maximum A Posteriori (MAP) Estimation
        - 9.1.3 Comparison to ML Estimation
        - 9.1.4 Conditional Expectation (MMSE)
        - 9.1.5 Mean Squared Error (MSE)
        - 9.1.6 Linear MMSE Estimation of Random Variables
        - 9.1.7 Estimation for Random Vectors
        - 9.1.8 Bayesian Hypothesis Testing
        - 9.1.9 Bayesian Interval Estimation
        - 9.1.10 Solved Problems
    - 9.2 Problems
        - 9.2.0 End of Chapter Problems
- 10 Introduction to Random Processes
    - 10.1 Basic Concepts
        - 10.1.0 Basic Concepts
        - 10.1.1 PDFs and CDFs
        - 10.1.2 Mean and Correlation Functions
        - 10.1.3 Multiple Random Processes

        - 10.1.4 Stationary Processes
        - 10.1.5 Gaussian Random Processes
        - 10.1.6 Solved Problems
    - 10.2 Processing of Random Signals
        - 10.2.0 Processing of Random Signals
        - 10.2.1 Power Spectral Density
        - 10.2.2 Linear Time-Invariant (LTI) Systems with Random Inputs
        - 10.2.3 Power in a Frequency Band
        - 10.2.4 White Noise
        - 10.2.5 Solved Problems
    - 10.3 Problems
        - 10.3.0 End of Chapter Problems
- 11 Some Important Random Processes
    - 11.1 Poisson Processes
        - 11.1.0 Introduction
        - 11.1.1 Counting Processes
        - 11.1.2 Basic Concepts of the Poisson Process
        - 11.1.3 Merging and Splitting Poisson Processes
        - 11.1.4 Nonhomogeneous Poisson Processes
        - 11.1.5 Solved Problems
    - 11.2 Discrete-Time Markov Chains
        - 11.2.1 Introduction
        - 11.2.2 State Transition Matrix and Diagram
        - 11.2.3 Probability Distributions
        - 11.2.4 Classification of States
        - 11.2.5 Using the Law of Total Probability with Recursion
        - 11.2.6 Stationary and Limiting Distributions
        - 11.2.7 Solved Problems
    - 11.3 Continuous-Time Markov Chains
        - 11.3.1 Introduction
        - 11.3.2 Stationary and Limiting Distributions
        - 11.3.3 The Generator Matrix
        - 11.3.4 Solved Problems
    - 11.4 Brownian Motion (Wiener Process)
        - 11.4.0 Brownian Motion (Wiener Process)
        - 11.4.1 Brownian Motion as the Limit of a Symmetric Random Walk
        - 1.4.2 Definition and Some Properties
        - 11.4.3 Solved Problems
    - 11.5 Problems
        - 11.5.0 End of Chapter Problems
- 12 Introduction to Simulation Using MATLAB
- 13 Introduction to Simulation Using R
- 14 Recursive Methods
- Appendix
    - Some Important Distributions
    - Review of the Fourier Transform
- Bibliography
